262 CWNE's worldwide (<http://www.cwnp.com/certifications/cwne>)

Wireless and mobile networks become business and mission critical for many vertical markets. These wireless networks need to be designed, secured and maintained 24x7.

Practical experience of wireless professionals is most important understanding customer needs, but it also relates to professional certifications to maintain standardization and meeting organisational and government regulations. EMEA grows rapidly with nationwide broadband networks, Public WiFi networks and adoption of mobility in the enterprise.

The value and standardization to become a CWNE expert is to get practical experience in wireless design, implementation, administration, security, analysis and technical sales. Who are the current wireless experts and early adopters in EMEA?
